

Message from Editor in Chief of Thai Journal of Gastroenterology 2007-2016

Dear Members

This is the last issue for this year and also the end of GAT Society 2014-2016 committee team. This year we are able to work more effective to provide many quality manuscripts and all topics for our readers. This issue of TJG journal contains many interesting and knowledgeable topics, especially the X-ray corner, where you can see “Imaging of the peritoneum and mesentery” and Endoscopic corner, show cases of ERCP from various causes. There is a distinguishing histopathology at Patho corner. Topic review of “Pathogenesis of alcohol induced liver injury and established animal model” is curious. Also, 5 original articles produced by GI fellows are included in this issue. Anyway we still need a lot of support from our members to submit more original articles.

Wishing you is successful with the hope that you will have many blessings in the year to come. Out with the old and in with the new: may you be happy the whole year through. Happy New Year 2017!

Prof. Duangporn Werawatganon, M.D.

The Editor in Chief
